Can solar power save money in Tokyo?

In the long run, yes. The Tokyo Metropolitan Environment Bureau estimates that installing solar power can contribute to saving about 7,700 yen monthly on your electricity bill in Tokyo. The amount of electricity a solar system can generate directly affects how much energy and money a household can save.

Are solar panels required in Tokyo?

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region.

Why is Tokyo launching a virtual power plant?

The push is reinforced by Tokyo's 2025 regulation requiring solar panels on new homes, and the launch of virtual power plant (VPP) programs--slated to begin in fiscal 2026--that will let households sell surplus energy to the grid.

What are Japan's solar energy subsidies?

The Japanese government has created the following subsidies for residents that are shifting toward solar power systems: This subsidy is for young couples or families with young children who want energy-efficient homes; the fund will contribute up to 600,000 yen for renovations and 64,000 yen for storage batteries.

By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations ...
