Nearly 11,000 MW of energy storage were added in 2024 to supplement generation capacity, increasing the total MW of energy storage 62% within the last year and 181% in the last two ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

The project will be delivered in stages, with initial construction expected to begin in late 2026 and full buildout of solar and battery facilities planned for 2027 and 2028. Officials at ...

The record solar installation figures helped drive more than 50GW of total renewable energy capacity additions in 2024, with the wind sector adding an additional 5GW ...

US battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity. This growth highlights the importance of ...

The foundation of our analysis comes from the EIA 860M form, which requires developers to report all newly constructed power projects that are 1 MW or larger, as well as projects ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage ...

The US Energy Information Administration expects 18.2 GW of utility-scale battery storage resources to come
