With NFPA setting the gold standard response time at four minutes for the first engine, some form of fire suppression must occur prior to the fire department's arrival. Fortunately, this technology ...

Safeprotex offers modular ev fire containment kits for charging stations and piles--featuring blankets, mats, and station boxes for rapid fire control.

A massive fire engulfed a factory that specializes in manufacturing EV charging stations; defective units were believed to be the cause. The fire could be seen for miles.

Protecting EV charging stations is critical. Discover advanced fire suppression systems like FK-5-1-12 and Stat-X for safer, cleaner, and more effective protection. Read about these innovative ...

Annual thermographic testing is recommended. Access to chargers, cables and charging infrastructure should be secured against unintended use and malicious damage. As ...
