Concern: Using collapsible containers will disrupt our operations and cause delays. The use of collapsible containers does necessitate additional steps compared with the ...

A shipping container clinic is a type of shipping container architecture using intermodal containers (shipping containers) as the structural element of a medical clinic that can be easily deployed to remote regions of the world. Shipping containers are ideal because of their inherent strength, wide availability and relatively low cost. In addition, and most relevant, shipping containers can be deployed anywhere in the world with the clinic already assembled within the container. This me...
