Why do hospitals need an uninterruptible power supply (UPS)?

That's why we're proud to offer our uninterruptible power supply (UPS). Our UPS provides an uninterrupted power supply to hospitals and other medical facilities, protecting critical equipment, data, and personnel since 2001 for over 500 projects. With our UPS, hospitals can rest easy knowing that their power source is secure and dependable.

What is an uninterruptible power supply?

An uninterruptible power supply is an electrical apparatus that offers emergency power even when other sources of input power fail.

What types of medical equipment require uninterrupted power supply?

Radiology: Radiology equipment such as CT Scanners, MRI machines, and X-Ray machines require uninterrupted power supply to prevent any loss of data. **Hemodialysis Center/Room:** Hemodialysis is a medical procedure that is used to remove waste and excess fluid from the blood of patients with kidney failure.
