Will US blockade stop Venezuela's refining units?

Dec 31 (Reuters) - The accumulation of residual fuel inventories in Venezuela's onshore tanks is forcing state energy company PDVSA to resort to extreme solutions to avoid shutting down refining units, as a U.S. blockade stopping tankers that are under sanctions from entering and leaving the country cuts exports to a minimum, four sources said.

Why is the US pursuing a tanker seizure of Venezuelan oil?

The U.S. has continued pursuing tanker seizures after intercepting two fully loaded cargoes of Venezuelan crude earlier this month. Venezuela's oil exports in December fell to about half the 950,000 bpd they averaged in November, according to preliminary figures.

Why does Venezuela produce so much oil?

Because it mostly produces extra-heavy crude that needs to be diluted for transportation and processed in complex refineries, Venezuela also produces high volumes of residual fuel, particularly high-sulfur fuel oil, which is typically exported to Asia.

Energy storage is essential to a clean and modern electricity grid and is positioned to enable the ambitious goals for renewable energy and power system resilience.

The accumulation of residual fuel inventories in Venezuela's onshore tanks is forcing state energy company PDVSA to resort to extreme solutions to avoid shutting down refining ...

Search all the ongoing (work-in-progress) battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Venezuela with our ...

Summary: Venezuela is embracing lithium battery energy storage to stabilize its power grid and support renewable energy integration. This article explores the project's technical advantages, ...

That's the vision behind the Caracas Power Plant Energy Storage Combined Unit - Venezuela's answer to the global energy puzzle. This hybrid marvel doesn't just generate ...

As Venezuela seeks reliable energy solutions amid growing demand, lithium-ion battery systems like Venezuelapack are emerging as game-changers. This article explores how advanced ...

As the first of its kind in the Andean region, the park is expected to play a key role in Venezuela's national energy strategy. The project was unveiled by N&#233;stor Reverol, the ...

As the first of its kind in the Andean region, the park is expected to play a key role in Venezuela's national energy strategy. The ...

Energy storage batteries are transforming how nations like Venezuela address power generation challenges. With abundant solar resources and growing renewable energy projects, advanced ...

Wait, no - actually, the real crisis multiplier is the lack of energy storage solutions. Solar panels installed in 2020? They're basically decorative after sunset. That's where shared storage ...
