The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with ...

The Victorian government has given the green light to what it says will be the state's biggest big battery, at least for now - a 350 megawatt (MW), two hour energy storage ...

Australia's Victoria government has expedited plans for a 400MWh battery energy storage system (BESS) and a 500MW solar-plus-storage project through its Development ...

The Victorian government has given the green light to what it says will be the state's biggest big battery, at least for now - a 350 ...

Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient. Our modern ...

It consists of a 360MW solar PV power plant and a 300MW co-located battery energy storage system (BESS), accounting for more than 1% of the state's total electricity ...

Construction proper has officially begun on a 119 MW solar farm and 100 MW / 200 MWh battery energy storage facility in Victoria's ...

Edify Energy has proposed a major new solar-plus-storage facility in Victoria, signaling another significant step in the state's transition to renewable energy. The project, ...

It consists of a 360MW solar PV power plant and a 300MW co-located battery energy storage system (BESS), accounting for more than ...

Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it ...

Draft strategy says batteries of all sizes - and deep storage - are critical to Victoria's future energy infrastructure. And it calls for all ...

Draft strategy says batteries of all sizes - and deep storage - are critical to Victoria's future energy infrastructure. And it calls for all replacement appliances to be electric.

Victoria's clean energy transition is accelerating with the approval of a \$453 million Battery Energy Storage System (BESS) in north-east Victoria, backed by leading Chinese firm ...

Construction proper has officially begun on a 119 MW solar farm and 100 MW / 200 MWh battery energy storage facility in Victoria's northwest with the state government saying ...
