With energy storage becoming critical infrastructure for grid stability, Enspired is positioned to capture significant market share as renewables scale globally.

Taking place at the InterContinental Hotel, the event will be hosted by Cellcube, one of the leading flow batteries companies, proudly founded and located in Vienna.

VERBUND, Austria's leading energy company, is working with TU Wien on an innovative technology that could revolutionise energy storage: the oxygen ion battery.

But beyond the prestigious investor lineup and rapid European expansion, this funding round raises a crucial question: why is venture capital flowing into battery optimization ...

Vienna-based enspired secures over EUR40 million in Series B funding to accelerate worldwide expansion of its AI-powered battery energy storage optimisation platform, driving ...

Alexander Opitz, Professor of Electrochemical Energy Conversion at the Vienna University of Technology, is researching how ...

Alexander Opitz, Professor of Electrochemical Energy Conversion at the Vienna University of Technology, is researching how oxygen ion batteries can be used as a new type ...

This battery has several important advantages. Although it does not allow for quite as high energy densities, its storage capacity does not decrease irrevocably over time: it can be regenerated ...

Imagine storing energy as simply as filling a balloon with air--sounds almost too easy, right? That's
