What projects are included in the hydrogen infrastructure projects database?

Projects in planning or under construction are also included. The Hydrogen Infrastructure Projects Database covers all projects under development worldwide of hydrogen pipelines, underground storage facilities and import/export terminals dedicated to low-emissions hydrogen and hydrogen-based fuels.

What is the source hydrogen production project database?

Source Hydrogen production project database link. The Hydrogen Production Projects Database covers all projects commissioned worldwide since 2000 to produce hydrogen for energy or climate change-mitigation purposes.

Where can I find information on hydrogen refuelling stations?

LBST has operated the database h2stations.org since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and updated continuously from multiple sources on a best effort basis.

When is the hydrogen production & infrastructure projects database updated?

The Hydrogen Production and Infrastructure Projects Database is updated annually in the fall. The International Energy Agency works with countries around the world to shape energy policies for a secure and sustainable future.

In 2023, hydrogen demand in the region reached 4 Mt, mostly for use in oil refining and chemicals manufacturing. Almost 90% is produced using natural gas, which contributes to the region's ...

Our interactive global map features operational and announced projects to produce low-emissions hydrogen, classified by technology route and status, from concept to ...

LBST has operated the database h2stations since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and ...

Find hydrogen fueling stations by location or along a route. Use the advanced filters to search for private and planned stations, as well as hydrogen fueling stations to match certain search criteria.

The Hydrogen Infrastructure Projects Database covers all projects under development worldwide of hydrogen pipelines, underground storage ...

Our interactive global map features operational and announced projects to produce low-emissions hydrogen, classified by ...

The Hydrogen Infrastructure Projects Database covers all projects under development worldwide of hydrogen pipelines, underground storage facilities and import/export terminals dedicated to ...

Use this tool to view alternative fuel corridors designated by the Federal Highway Administration and to measure the distance between stations that meet the Round 8 criteria ...

Located just outside Nicaragua's capital, the Managua Energy Storage Station is Central America's largest battery storage system. With a capacity of 120 MW/240 MWh, it acts as a ...

Hydrogen fueling stations can be divided into off-site stations, where hydrogen is delivered by truck or pipeline, and on-site stations that produce and compress hydrogen for the vehicles.

Hydrogen fueling stations can be divided into off-site stations, where hydrogen is delivered by truck or pipeline, and on-site stations that ...

Find hydrogen fueling stations by location or along a route. Use the advanced filters to search for private and planned stations, as well as ...

The Baseline case describes how demand for hydrogen could evolve considering energy- and climate-related policies already in place in the countries of the region, and an uptake on ...

Use this tool to view alternative fuel corridors designated by the Federal Highway Administration and to measure the distance between ...

In 2023, hydrogen demand in the region reached 4 Mt, mostly for use in oil refining and chemicals manufacturing. Almost 90% is produced using ...

What are the hydrogen energy base stations in Managua
