The plurality of solar panels are configured to receive sunlight and convert to solar energy for storage in the battery and supply energy to electric vehicles during transport of the container (s).

The container utilizes solar energy gathered from a solar collector on its outer surface to power a refrigeration system that is able to maintain a temperature that is ...

Container energy storage patent On April 9, CATL unveiled TENER, the world's first mass-producible energy storage system with zero degradation in the first five years of use.

The one or more shipping containers may include a PV subsystem, a battery subsystem, PCS, control electronics, and the like. The one or more shipping containers may be pre-configured for...

Search specific patents by importing a CSV or list of patent publication or application numbers.

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility ...

In one embodiment, the invention is directed to a solar-powered refrigerated container for the storage and chilling of food, beverages or any other applicable products.

There are known technologies to use the outdoor cabinets or the combined base stations to solve the problem of traditional container energy storage systems. However, the outdoor cabinets or ...
