The project will help displace fossil fuel-fired generation when the demand for power is highest. The 100 MW East River Energy Storage System will hold enough electricity to power more ...

Lithium-ion batteries are increasingly being used to store power for electrical grids, but some localities are concerned about fire risks.

This is where energy storage systems (ESS) swoop in like superheroes. Recent data from Tesla's Megapack installations show facilities reducing downtime by 40% while slicing energy costs ...

Optimal energy utilization within industrial parks constitutes a fundamental aspect of energy storage projects. By implementing advanced storage technologies, such as lithium ...

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in ...

Once completed, the 15 MW/60 MWh distribution-level project will be the largest battery storage installation in New York City; it will replace existing generation planned to retire ...

When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the largest ...

The IDA has supported approximately 254MW of battery storage capacity in New York City, generating more than \$400 million of private investment and supporting progress ...

Con Edison President Matthew Ketschke reported that his company will place the largest battery energy
