Recognized as a biodiversity hotspot and having the ambitious goal of achieving a 50% share of energy from renewable sources in its ...

EPCG's Board Chairman Milutin Djukanovic outlined the company's main strategies for the energy transition: generating electricity close to the point of consumption, integrating solar power into ...

Montenegro is advancing its green energy initiatives through a landmark partnership between its state-owned power utility, EPCG, and French renewable energy ...

This article presents Montenegro's solar journey - from early pilot projects to nationwide adoption - highlighting how inclusive financing, streamlined regulation, and public ...

Planned large-scale energy storage projects, if strategically implemented, can contribute to energy security and make solar energy a ...

The intensity of solar radiation is among the highest in Europe, which creates ideal conditions for a serious energy transition by introducing solar thermal collectors and photovoltaic systems in ...

The intensity of solar radiation is among the highest in Europe, which creates ideal conditions for a serious energy transition by introducing solar ...

Planned large-scale energy storage projects, if strategically implemented, can contribute to energy security and make solar energy a backbone of Montenegro's grid.

This synergy between new technology and established assets underscores a thoughtful approach to

maximizing the benefits of energy storage within the national grid.

The utility-scale solar PV plants and energy storage in development will help Montenegro alleviate the strains of the energy crisis, while reversing decades of neglect and lack of investment in ...

As Montenegro increases its share of intermittent renewables, from solar to wind, the integration of C& I ESS (commercial and industrial energy storage systems) becomes vital ...

The utility-scale solar PV plants and energy storage in development will help Montenegro alleviate the strains of the energy crisis, while reversing ...

Montenegro""s largest power utility, EPCG, said it plans to develop lithium-ion battery energy storage systems at four locations in order to harness excess renewable energy production and ...

Recognized as a biodiversity hotspot and having the ambitious goal of achieving a 50% share of energy from renewable sources in its gross energy consumption by 2030, ...
