How many battery swap cabinets are there?

With rich industry experience, we have deployed more than 5,000 battery swap cabinets and put into use 65,000+ smart lithium batteries, providing convenient services for drivers in more than 35 countries around the world, helping clients build a profitable and scalable battery swap business.

What is a battery swapping station?

The battery swapping station is installed and used throughout the world, which also means that it may be used in various environments. To guarantee the stable operation of equipment and components in the electrical cabinet, temperature and humidity monitoring in the cabinet is particularly important.

How a battery swapping cabinet is managed by Shenrui?

Program Process ---- The battery operation data and the operation information of the battery swapping cabinet are uploaded to the cloud for management through the IOT module of the battery swapping cabinet. Shenrui provides on-board VCU, vehicle control module, replacement battery BMS module, module and cloud platform data can be directly linked.

How to know if a battery swapping station is safe?

The detection of internal water accumulation in the battery swapping station is also very important, so it needs to be checked whether the rainwater in the battery cartridge is completely discharged to prevent internal electrical short circuits and guarantee the safety and reliability of the battery in the battery swapping station.
