What is Telecommunications in Latvia?

Telecommunications in Latvia encompass a broad range of services including the internet, telephones, television, and radio. In Latvia, the digital engagement and proficiency of the population closely align with European Union (EU) averages. In 2022, internet usage among individuals reached 90%, marginally above the EU average of 89%.

Does Latvia use e-government services?

In 2022, 77% of internet users in Latvia utilized e-government services, higher than the EU average of 74%. The country achieved scores of 87 out of 100 for digital public services for citizens and 86 out of 100 for businesses, exceeding the EU averages of 77 and 84, respectively.

Does Latvia have Internet filtering?

There is no OpenNet Initiative (ONI) country profile, but Latvia is shown as no evidence of Internet filtering in all areas for which ONI tests (political, social, conflict/security, and Internet tools) on the ONI global Internet filtering maps. The constitution and law provide for freedom of speech and of the press.

How many cellular phone lines are there in Latvia?

This led to overwhelming use of cellular phones for private customers, fixed lines being requested mostly by companies. In Latvia, there exist more than 2 million mobile cellular phone lines but only 174,000 fixed phone connections as of 2022.
