Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Why do we need a battery system in Latvia?

The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply. The batteries will work as modern accumulators for storing large volumes of energy, which will be important for ensuring energy balance once the Latvian electricity supply grid works in sync with the European grid."

Are battery energy storage systems a growing demand?

"A growing demand in the energy market for battery energy storage system (BESS) technologies is developing currently, and the trend is expected to remain stable in the future.

What is the most ambitious energy independence project in the Baltics?

Kaspars Melnis, the Minister of Climate and Energy points out: "The most ambitious energy independence project in the Baltics is in its final phase, with major contributions from all the stakeholders. The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply."

Similarly to solar energy and electromobility, this is a strategically new business area for Latvenergo, which is aiming to become the leading player in the Baltic BESS market.

Rolls-Royce will supply an mtu EnergyPack QG large-scale battery storage system with an output of 80 MW and a storage capacity of 160 MWh. This makes the system one of ...
