As Anish Shah, CEO of Mahindra Group, explained during the Keeping up with Smart Factories session, their digital transformation has enabled real-time production ...

Global challenges are rewiring supply chains and manufacturing companies are rethinking their operations. From Brazil to Singapore, here's how six countries are managing ...

10 new manufacturing sites have joined the World Economic Forum's Global Lighthouse Network. There are now 54 "Lighthouses", the world's most advanced factories, ...

A new report from the World Economic Forum identifies factories of the future that are reshaping manufacturing through the early adoption of game-changing technologies.

To succeed, manufacturers must embrace artificial intelligence (AI) and its latest advancement - AI agents - which push the boundaries of innovation and transform factories. ...

Connected factories track the location of labour, materials, machines, and moveable assets in real time. IIoT digitizes the production environment by integrating the ...

Building the factories of the future Microfactories certainly look like the factories of the future, but how does a manufacturer know if it should change its entire operational setup in ...

AI is transforming factories, optimizing production, cutting costs and boosting sustainability - the Global Lighthouse Network provides examples.
