-----

The US Energy Information Administration (EIA) projects 32.5 GW of solar, 18.2 GW of energy storage, and 7.7 GW of wind will be ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added ...

Battery storage, wind, and natural gas power plants account for virtually all of the remaining capacity additions for 2025. Developers could set a record for capacity additions if ...

Solar capacity is forecast to grow 9% in 2025, while wind is expected to jump 21%. And China is way ahead of everyone - it's expected to install 66% of the world's new solar and ...

The U.S. Department of Energy's Energy Information Administration (EIA) forecasts 32.5 GW ac of utility-scale solar capacity and just over 18 GW of energy storage will ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new ...

Clean energy momentum builds as solar and wind outpace global electricity demand growth Solar and wind are now expanding fast enough to meet all new electricity ...

The U.S. Department of Energy's Energy Information Administration (EIA) forecasts 32.5 GW ac of utility-scale solar capacity ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions.

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity. The Oasis de Atacama in Chile will ...

The US Energy Information Administration (EIA) projects 32.5 GW of solar, 18.2 GW of energy storage, and 7.7 GW of wind will be deployed this year. These additions will ...

Explore the biggest renewable energy innovations 2025--from AI grids and long-duration storage to green hydrogen and smart buildings.

Solar capacity is forecast to grow 9% in 2025, while wind is expected to jump 21%. And China is way ahead of everyone - it's ...

The U.S. is on track to add 60 GW of clean energy capacity in 2025, according to developer projections. If those numbers hold, that would represent 26% growth, compared to 2023's ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...
