-----

China installed 268 GW of new renewables capacity in the first half of 2025, nearly doubling year on year, with solar accounting for 212 GW of the total, says the nation's energy ...

Solar power contributed a small portion of China's total energy use in 2020, accounting for 3.5% of China's total energy capacity. [11] Chinese leader Xi Jinping announced at the 2020 Climate ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

China has recently achieved a remarkable milestone in solar energy, setting a new record for solar power capacity installation. In May, the nation added an astounding 93 ...

China is setting unprecedented records in solar and wind energy installations, achieving monumental growth in May 2025.

China's PV installations are set to hit 255 GW annually by 2025, targeting 1,000 GW total capacity. Explore the latest data on the China photovoltaic market.

China installed 104.93 GW of solar from January to April 2025, surpassing the 100 GW milestone 2 months earlier than in 2024, when the mark was reached in the first half, ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...

Chinese officials recently unveiled plans for what they claim will be the world's largest solar farm, spanning an immense 610 square kilometres (235 square miles) - roughly ...

Some of the largest projects under development are in the Inner Mongolia region in northern China. The Kubuqi Desert in Inner Mongolia is the planned site of the largest ...
