Are undocumented communication devices in Chinese solar inverters a risk?

Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their risk. During the investigation of inverters from China by experts in the USA, undocumented communication devices were found in some devices.

Are Chinese power inverters being used on solar panels?

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous sources within the federal government. The inverters are devices separate from power sources like solar arrays or batteries.

Did Chinese inverters have unauthorized communications equipment?

Solar Panels Cordon Press. U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday. The document reveals the presence of unauthorized and fraudulent communication devices in several Chinese-made solar power inverters.

Are Chinese solar inverters hidden inside solar panels?

But the implications were massive. This was just one of several similar discoveries over the past year. According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of these hidden Chinese devices embedded inside.

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, ...

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on ...

Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their risk. During the investigation of ...

Often described as the "brain" of solar systems, these devices manage power output and grid communication. U.S. officials found communication modules in some Chinese ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar ...

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy ...

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say how many they had found in total.

U.S. experts, inspecting grid-connected equipment, found unlisted communication devices in Chinese-manufactured solar inverters and batteries over the past nine months. ...

Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their ...

According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery ...
